CHOOSE HIGH PERFORMANCE

For builders, self-builders and homeowners alike, there is a growing determination to choose timber windows and doors - an inherently beautiful material that adds value and desirability to every build.

But timber is not just beautiful. Today's technologies ensure that multi-layered, engineered timber windows and doors are immensely long-lasting, secure and insulated. Any risk of warping or twisting has been eliminated.

Dale Joinery combines British design with cutting-edge Scandinavian timber technology to produce windows and doors of the very highest quality - backed by cast-iron guarantees for complete peace of mind.

Timber has a charm, character and performance that man-made alternatives cannot match, whilst also being an entirely sustainable choice - an increasingly important factor for many homeowners.

We only use European Redwood from sustainably managed plantations in Northern Europe - a timber whose performance has been proven over many centuries. As part of our environmental commitment we never use tropical hardwoods - whilst our full environmental policy, objectives, targets and records are available on request.

timber!

This cutting-edge technology is also key to all Dale Joinery products achieving high levels of energy efficiency. Every casement window is rigorously tested to BS6375-1:2009 for weather tightness and air permeability - meeting or exceeding the criteria for this exacting standard.

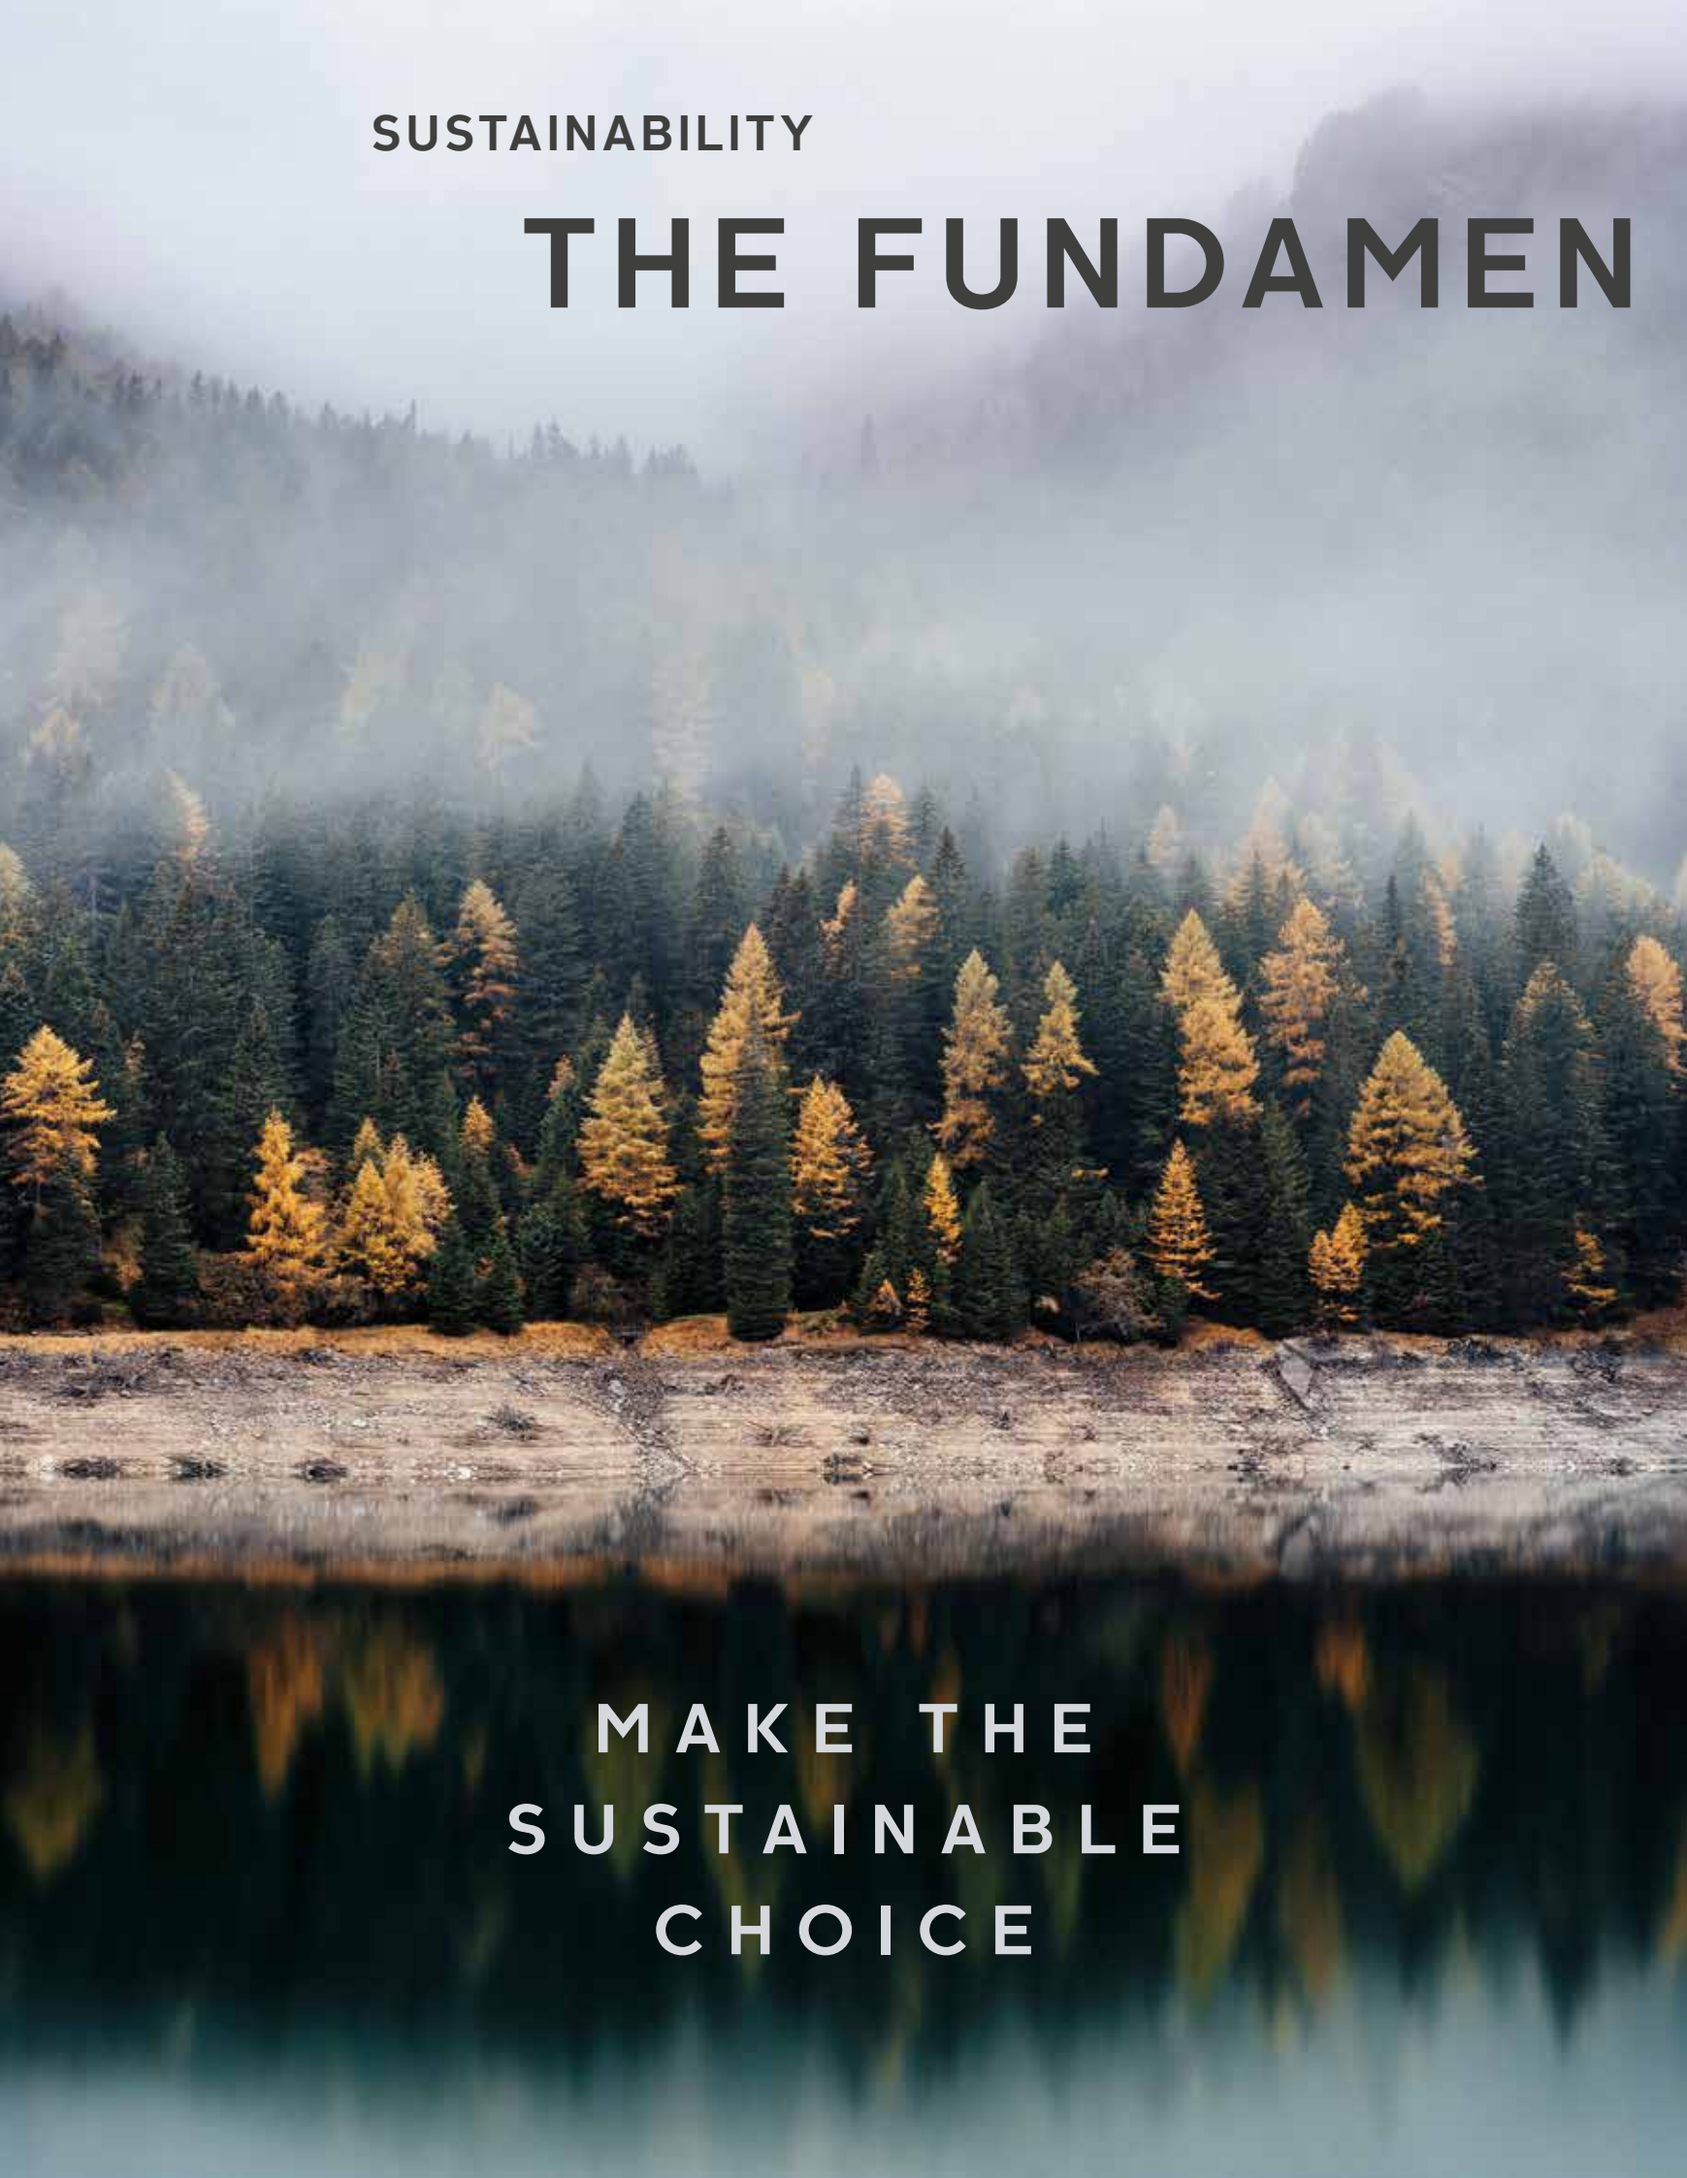

With high performance and proven sustainability, Dale Joinery windows and doors can make a huge difference to our customer's homes - not simply in the way they look but to the everyday experience of living with them. Warmth, security and ease of use, combined with enhanced home values make a compelling case for this most authentic of building materials.

SUSTAINABILITY
THE FUNDAMEN
MAKE THE
SUSTAINABLE
CHOICE

TAL FOUR

01 ALL OUR TIMBER IS SOURCED FROM MANAGED FORESTS

It's imperative that sustainably managed forests are the source of our timber, and why, for us, this is the only option – the destruction of wildlife habitats and biodiversity, and deforestation are very real problems where this is not the case – we re-plant more trees than we use.

Global tree stocks are replenished and expanded in a sustainable forest – our planet needs this for both the local eco-system to thrive and to keep up with the absorption of carbon dioxide from the atmosphere.

02 ENGINEERED TIMBER... GUARANTEED NOT TO WARP OR TWIST

Timber windows and doors have changed – sticking and warping through the seasons is a thing of the past.

Multi-layered, engineered timber is formed through finger jointing - using short pieces of perfect timber, mechanically bonded together to form longer lengths. Layered upon each other, the opposing grains then even out any natural moisture movement, resulting in an immensely strong and stable timber.

03 AN ENVIRONMENTAL CHAMPION IN THE CONSTRUCTION INDUSTRY

Sustainable timber, through responsible sourcing and replenishment, has the lowest embodied energy use during its journey to becoming a construction item, of any alternative-mainstream building material.

From growth to processing, production and transport, all the way through to the consumer, timber requires minimal processing when compared to other materials such as steel, concrete or aluminium – all of which require heavy, intensive handling and resultant emissions.

All trees have a physical limit as to the volume of carbon they can absorb – once this limit is reached, it only seems logical to use them in construction and plant further trees that can continue this amazing work.

04 A LIFE SPAN BEYOND ALL OTHERS

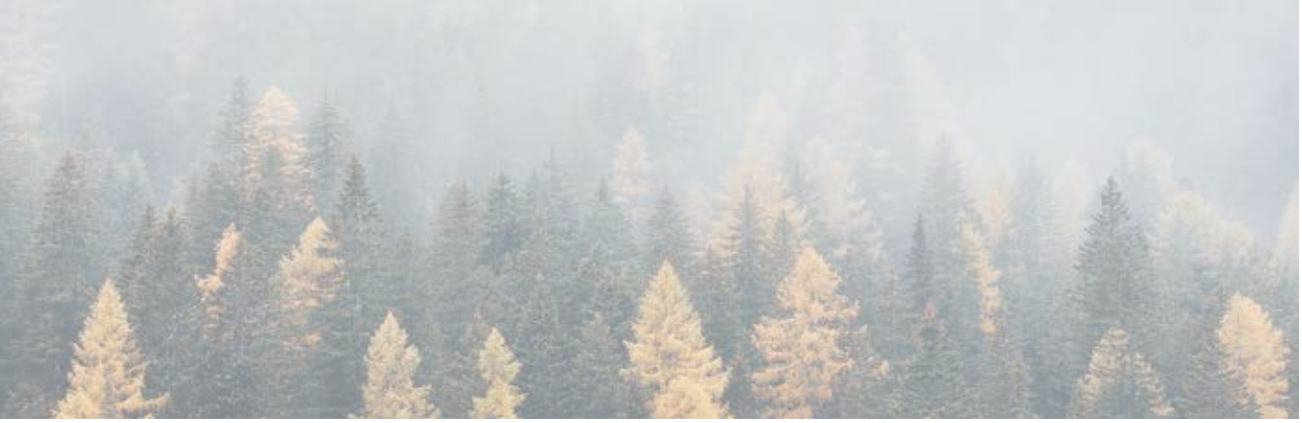

Have you ever thought about product life span? It may surprise you, and both you and any future owner will appreciate the consideration.

The average uPVC window will last around 16-18 years – compare that to a timber window, with a life of 60-80 years. It's quite a difference and that's even before you consider the environmental impact of their relative production and disposal processes.

Not forgetting, of course, timber can be maintained and repaired in a way that man-made alternatives simply can't be.

Surrounding ourselves with natural products is comforting – timber is a warm, friendly material and an all-around better insulator.

OUR COMMITMENT

Dale Joinery is proud to have achieved Carbon Neutral status!

This strict and rigorous certification process, and demonstrates our commitment to reducing our impact on the environment and climate change.

Reducing the overall impact that greenhouse gas emissions have on the planet, will work to slow the rate of, and eventually minimise the effects of climate change.

Carbon Neutral certification focuses on two critical areas – reduction and offsetting. We have honed our processes, across the whole business to reduce our carbon impact, and continue to do all we can to further reduce our effect, while participating in various initiatives that provide a beneficial outcome for the wider environment.

Future generations are relying on us to make the best use of sustainable, natural materials.

As trees grow, up to one ton of carbon dioxide per tree is absorbed from the atmosphere and stored securely. And what's more, when this slow, cold grown Redwood from northern European countries is converted into our award-winning timber windows and doors, this pollutant continues to be stored.

We re-plant further trees, that also go on to absorb CO2, and so the cycle continues. Carrying Forest Stewardship Council® (FSC® – C124392) certification, our timber is both sustainably sourced and ready for industry in terms of size and maturity.

FOR SELF-BUILDERS, SINGLE

A simple philosophy is at the root of everything we do...

a serious commitment to attentive, market-leading service.

We know that there are many options to choose from when considering your window and door joinery partner, and we consistently strive to be a cut above the rest.

Whether you have a traditional or contemporary style in mind, your project is one property or many, our core values and approach are the same; personal and supportive.

PROPERTIES, DEVELOPERS OR MULTI-PLOTS

Our service approach is as adaptable as our product range.

All our windows and doors are made to measure, to suit the requirements of your project, meaning we can work with you to achieve your vision.

The experience you have with Dale will be tailored to your needs, project and scale – making timely decisions and involving us early on in your plan, will ensure a stress-free fit with your schedule.

VISIT US...

Our showroom is an unmanned facility. A member of our team will be happy to meet you and guide you through the range, by appointment.

Our showroom is situated within the National Self Build & Renovation Centre (NSBRC), near Swindon, the UK's permanent venue for independent homebuilding advice and support.

Browse a selection of our doors and windows at your leisure, experiencing how they work, with full size, fully operational samples.

EXPERIENCE OUR PRODUCTS FOR YOURSELF

PEACE OF MIND...

ON SCHEDULE

Following rigorous checks before leaving the factory, and further quality control at our warehouse, your made-to-order windows and doors are secured for safe transit on pallets and will arrive at a time and date agreed with you on our own trucks, equipped with forklifts to unload them for you.

USER-FRIENDLY QUOTES

We'll be happy to talk to you about your project at any time in the process. We can use your drawings or measurements to produce a quotation for you – our user-friendly, concise and industry-leading quotations allow novices and professionals alike to get a clear view and understanding of each product required.

KNOWLEDGE

Our knowledgeable team are well versed in the entire process of a build project, able to offer advice and guidance to ensure everything turns out just as you want it to. We've worked on projects that include everything from a single timber window to huge multi-plot developments consisting of hundreds of windows and doors.

MADE FOR YOU

None of our products are kept in stock; everything is made to order – some things are worth the wait when it's being made just for you. Our products leave the factory fully finished, meaning they are painted or stained with a multi-layer protection system, and come with all the glazing in place, ready to install on-site. Manufacturing lead times are always discussed upfront, so you're in the know on scheduling.

CRAFT & MACHINE

Our state-of-the-art manufacturing facilities utilise the very best machine processes combined with the skill of our factory teams, to produce a superior product range.

HANDLING

All delivery lorries are equipped with forklifts to deliver products on site, to a location of your choice.

Always ensure that there is adequate labour or the appropriate mechanical lifting gear available on site to safely offload and transport the product on site to avoid causing any damage during any onward movements.

Window and door sashes can be easily removed from their frames, to reduce weight while fitting takes place, and refitted once in situ.

Cleaning kits can be supplied, upon request.

SITE STORAGE

- Long term storage of our products on site is not recommended.
- Timber products should be stored in a clean dry area and kept away from other site activities to avoid damage to the timber, glass, ironmongery or factory finishes.
- Failure to store, handle and maintain our timber products appropriately could invalidate your guarantees.
- Always place factory finished and glazed products on bearers and store vertically.
- Cover to avoid dust and other contaminants. Non-permeable sheeting such as polythene, should be avoided, unless left sufficiently free to allow good ventilation. Care must be taken when removing any protective coverings..
- Sashes must always be kept in the closed position during the building/ installation process and any on site glazing should also be carried out with the sashes closed.
- Allow sufficient spacing between each product to prevent handle or cill damage, for ease of handling and to maintain good air circulation around the products.
- Always avoid storing products in extremes of light or temperature or in unventilated rooms, or where wet trades are taking place.

ADDITIONAL IMPORTANT INFORMATION IS SUPPLIED AT TIME OF PRODUCT DELIVERY REGARDING CARE, HANDLING AND STORAGE.

CASEMENT WINDOWS

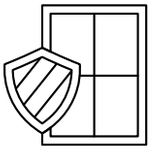

Three coat finish

Multi-layer engineered timber

Internally beaded glazing

Enhanced security

CASEMENT WINDOWS

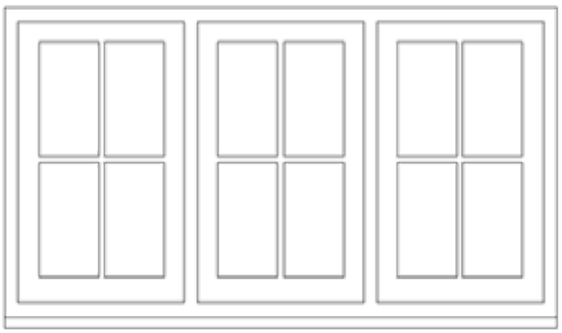

Our most popular range, Dale Joinery casement windows include Flush and Stormproof options, the latter ideal for homes in more exposed positions. Whichever you choose both offer exceptional levels of insulation.

FROM CONCEPT TO CONSTRUCTION

Dale Joinery Flush Casements have sashes that close flush into the frame whilst our Stormproof Casements have sashes that close overlapping the frame, providing additional weather protection. Slim glazing bars in a wide variety of configurations may be added as required to enhance overall appearance.

With advanced draught sealing, highly efficient double glazing, internal beading and robust, multi-point locking systems, Dale Joinery Casement Windows deliver high performance and an authentic appearance.

With a wide range of styles and over 200 colours available, including the option to have different colours inside and outside, together with a complementary range of entrance doors and French doors, you can be certain to find the perfect look for your home.

SASH WINDOWS

Well-proportioned box sashes add prestige, value and style. Dale Joinery's sash windows also deliver 21st century standards of insulation, weathering and performance, together with a smoothness of operation our predecessors would envy.

FOR A TRULY TRADITIONAL LOOK

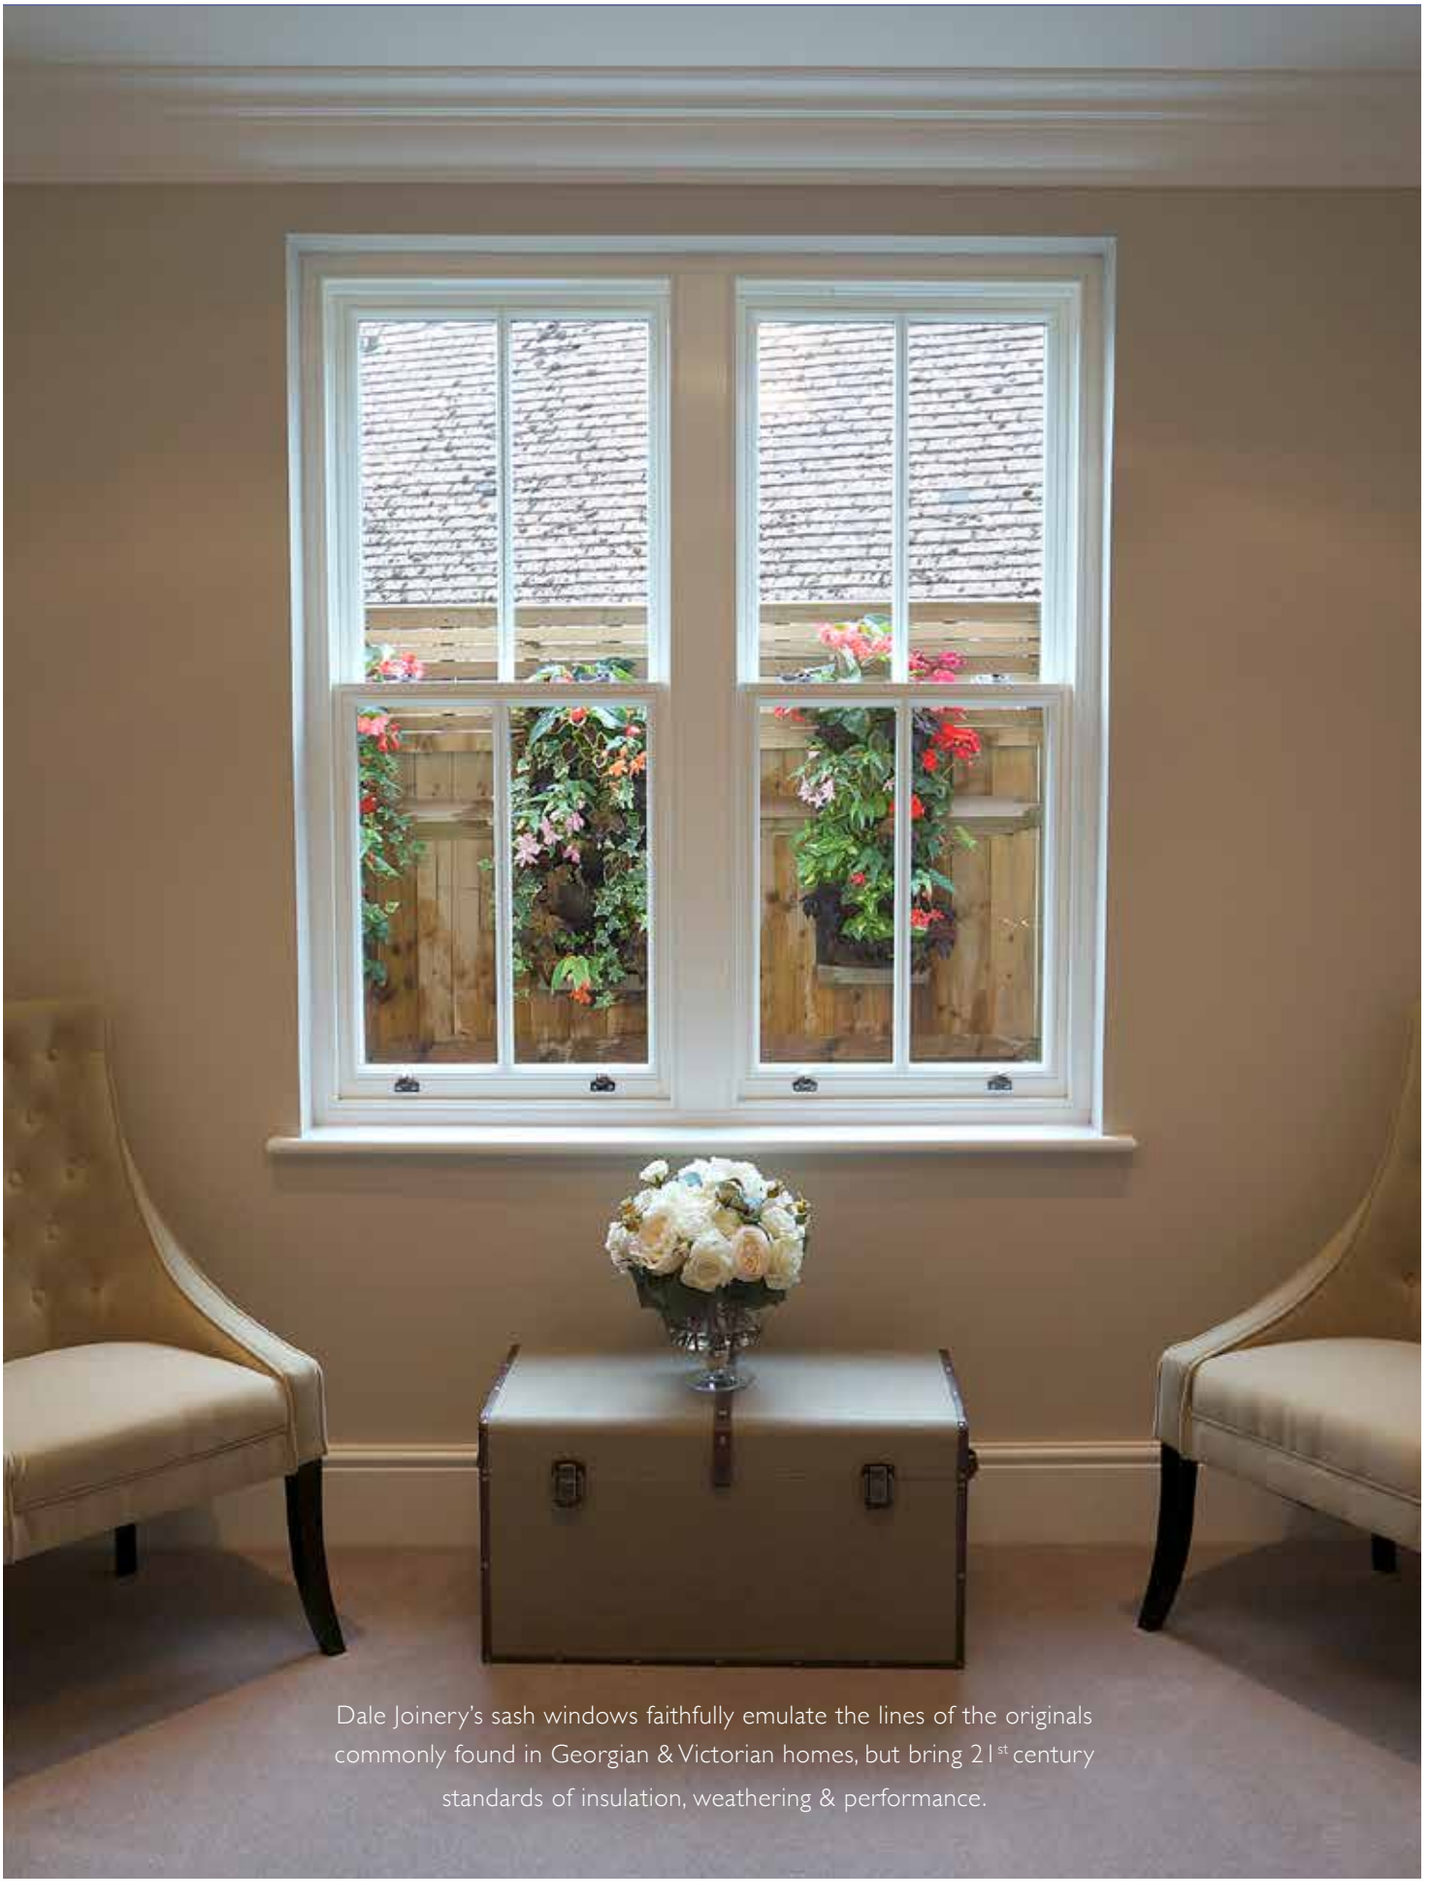

Hung on neatly concealed springs, or traditional weights and sash cords, the choice of style can be tailored to suit the property. The use of energy efficient glazing helps to lock in the heat, whilst careful attention to draught stripping has eliminated rattles and draughts.

Our system also allows you to tailor your sash windows to the precise requirements of your project, with slim glazing bars available in a wide variety of configurations.

Dale Joinery's sash windows faithfully emulate the lines of the originals commonly found in Georgian & Victorian homes, but bring 21st century standards of insulation, weathering & performance.

INCREASE KERB APPEAL WITH DALE JOINERY

Dale Joinery entrance doors are made-to-order in an extensive range of styles and may be enhanced with feature glass, including designs based on original Victorian glazing motifs.

A wide range of traditional shades are available, together with more subtle colours such as Blue Grey, Chrome Green and Oyster White. Multiple colours can also be combined on the same door, enabling the inside face to match your internal decor.

A selection of ironmongery can be added, including spy holes, letter-plates, knockers and security chains, whilst all doors are hung on robust hinges. Your security is assured by multi-point locking mechanisms, whilst we are also able to provide door sets that comply with Document M Mobility Access regulations.

IRONMONGERY, GLASS & COLOUR

The fine detail is the key

to making your home unique.

IRONMONGERY COLLECTIONS

Working closely with Coastal, Dale Joinery are pleased to offer a comprehensive selection from their range.

Born on the rugged shores of Cornwall in 2013, Coastal Group is a family-owned business which specialises in the design and manufacture of precision-made hardware solutions for external doors and windows.

With door hardware being the first thing physically touched at a property, it plays an important role in creating the right first impression. Every piece of hardware designed and manufactured by Coastal is created to enhance the look and improve the performance and durability of the doors and windows they are fitted to.

Made from 316 Marine Grade Stainless Steel as standard, they have strength and durability on their side, while higher levels of corrosion resistance are an ideal asset in external hardware. No matter the location of your doors or windows, Coastal hardware will perform. The range caters for both classic and contemporary styles in a range of matching finishes.

COASTAL

Shaping the future.

The Collection

BLU™ 316 Marine Grade Stainless Steel Suited Range in PVD Stainless Satin Brass Finish

Coastal's BLU™ range is made from 316 Marine Grade Stainless Steel as standard for added strength and durability. So no matter where your doors or windows are fitted you can have peace of mind your hardware will last.

The range caters for both classic and contemporary styles in a range of matching finishes.

Our colour options

White painted windows look traditional and smart but are not the only option - householders may be surprised to learn that only 40% of the windows we sell are white. Dale products are available in hundreds of different shades - from vibrant hues to subtle creams and greys. Multiple colours can also be combined on one item, enabling you to finish the internal frame to match your room decor. The reproduction of the colour palette shown on the opposite page is for illustrative purposes only.

Popular colour options

These samples have been produced to represent the colour choices available and are as close as accurately possible. However, because wood is a natural material the surface texture and colour shade may vary.

RAL colours

In addition to our most popular colour palette, our products are available in any colour from the RAL Classic range providing a further 210 shades for clients to choose from.

Stain options

Due to the natural and attractive variance of the timber in colour and texture, stain finishes can vary from one piece of timber to another. Stain finishes shown are indicative of the shades available, but we are unable to guarantee a complete colour match either in installations carried out at the same time or in staged time installations.
